

Errors found in http://www.symfony-project.org/tutorial/1_1/my-first-project

== FIXED: 1 ==

couldn't use a class called 'Comment' (conflict with phing

== 2 ==

{{{

If you want to switch to MySQL for this project, just type the following command line:

```
$ php symfony configure:database mysql://root:pa$$word@localhost/symfony_project
```

Change the DSN argument to match your settings (username, password, host, and database name) and then create the database with the command line or a web interface (as described in the model chapter).

}}}

You also need to modify config/databases.yml: delete database, change phptype from sqlite to mysql

{{{

all:

 propel:

 class: sfPropelDatabase

 param:

 phptype: mysql

 dsn: 'mysql://root:pa\$\$word@localhost/symfony_project'

}}}

== 3 ==

{{{

While you are at it, you can change the title of your pages. Edit the view configuration file of the application (sf_sandbox/apps/frontend/config/view.yml), locate the line showing the title key and change it to:

default:

 http metas:

 content-type: text/html

metas:

 title: The best blog ever

 robots: index, follow

 description: symfony project

 keywords: symfony, project

 language: en

}}}

should say

{{{

While you are at it, you can change the title of your pages. Edit the view configuration file of the application (sf_sandbox/apps/frontend/config/view.yml), locate the 'metas' section and change it to:

```
metas:
  title:    The best blog ever
  robots:  index, follow
  description: symfony project
  keywords: symfony, project
  language: en
```

make sure the 'metas' section is indented so that it lines up with 'http_metas' and 'stylesheets'
}}}

== 4 ==

there is no 'show' action generated for 'post' (and 'comment')

=> change to 'php symfony propel:generate-crud frontend post Post --with-show' to generate show action and template

== 5 ==

there is no default 'pretty' css file (main.css is empty)

== 6 ==

'list' action isn't generated. need to change the layout to:

```
{{{
<li><?php echo link_to('List of posts', 'post/index') ?></li>
<li><?php echo link_to('List of comments', 'comment/index') ?></li>
}}}
```

== 7 ==

Fatal error: Call to undefined method Post::__toString() in
/Users/webdev/symfony/1.1/lib/plugins/sfPropelPlugin/lib/propel/widget/sfWidgetFormPropelSelect.class.php on line 88

had to add the code below to the post model...

```
{{{
function __toString()
{
    return $this->getTitle();
}
}}}
```
